

Student

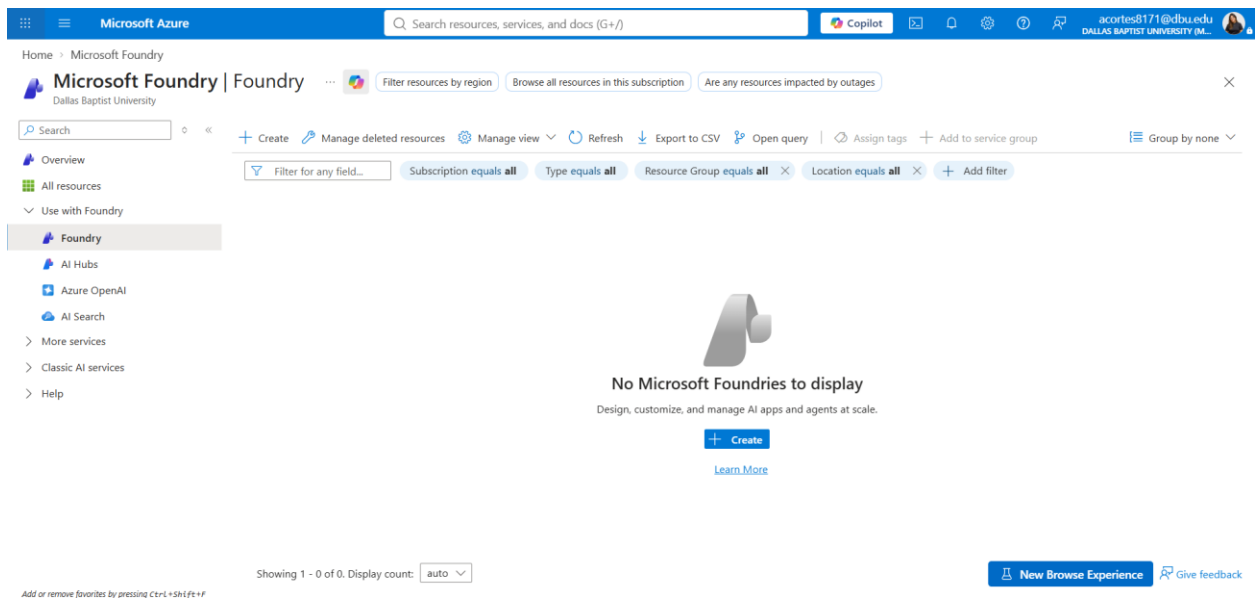

1. Navigate to students portal

<https://azure.microsoft.com/en-us/free/students?icid=portal>

2. Search foundry

3. Create in create or create a resource

4. Set the properties example of resource group “lead”

The screenshot shows the 'Create a Foundry resource' wizard in the Microsoft Azure portal. The 'Instance Details' tab is selected. A modal dialog is open for creating a new resource group. The dialog contains the following information:

- Subscription:** Azure for Students
- Resource group:** (Empty dropdown with a 'Create new' link below it)
- Name:** lead
- Region:** (Empty dropdown)

The dialog also includes a description: "A resource group is a container that holds related resources for an Azure solution." and buttons for 'OK' and 'Cancel'.

5. Provide a name to your project

The screenshot shows the 'Create a Foundry resource' wizard in the Microsoft Azure portal. The 'Instance Details' tab is selected. The resource group is set to '(New) lead'. The project name is 'aspire-demo'.

Instance Details

Select the subscription to manage deployed resources and costs. Use resources groups like folders to organize and manage all your resources.

Your first project

Foundry organizes development artifacts into projects—containers for managing permissions, monitoring, costs, and more. When you create a resource, a project is also created. This "default" project has more capabilities than projects that you create later. [Learn more.](#)

Default project name *

Content Review Policy

Foundry provides access to Azure OpenAI models. To detect and mitigate harmful use of the Azure OpenAI Service,

6. Click in review and create (it takes a couple of minutes)

You will see this ... Deployment in progress

7. After the deployment is completed you will see and clic Go to Foundry portal
